MARCO JEAN F. PAGOTAISIDRO

Web Developer

Purok 2B Malagutay, Zamboanga City • pagotaisidromarcojean@gmail.com • https://marcojeandev.vercel.app/

PROFESSIONAL SUMMARY

BSIT graduate and freelance web developer building full-stack applications with Laravel, Vite + React, and TypeScript. Delivered client-based systems including a school enrollment system, teacher evaluation, accreditation, an online library, and an HRIS with biometric integration. Experienced in database design, secure authentication and authorization, and API development with Sanctum and Axios. Uses AI tools to speed up development and documents code and system changes clearly.

SKILLS

- **Backend:** Laravel, PHP, Eloquent ORM, database migrations, table relationships
- **Frontend:** React (Vite), TypeScript, JavaScript, HTML, CSS
- **API:** RESTful APIs, Laravel Sanctum, Axios, filtering, categorizing, and pagination
- **Security:** Authentication, token-based access, role-based access control, policies, middleware, rate limiting
- **Workflow:** AI-assisted development, code and system change documentation
- **Professional:** Client communication, requirements gathering, attention to detail, problem-solving

WORK EXPERIENCE

Freelance Web Developer | Self-employed | 2025 to Present

- Delivered client-based web projects for student clients, working from requirements through to completed systems.
- Built full-stack applications with Laravel on the backend and Vite + React with TypeScript on the frontend.
- Designed relational databases using migrations and Eloquent table relationships.
- Secured applications with Sanctum token authentication, role-based access, policies, middleware, and rate limiting.
- Built APIs consumed through Axios, with filtering, categorizing, and pagination for efficient data loading.
- Used AI tools to speed up development and documented code and system changes throughout each project.

Selected Projects

- **School Enrollment System:** Student enrollment management system.
- **Teacher Evaluation System:** Platform for evaluating teacher performance.
- **Accreditation System:** System for managing accreditation requirements and records.
- **Online Library System:** Web-based library management and access system.
- **HRIS with Biometric Integration:** Human resource information system integrated with biometric devices.

EDUCATION

Bachelor of Science in Information Technology (BSIT) | Zamboanga Peninsula Polytechnic State University | 2026

ADDITIONAL INFORMATION

- **Strengths:** Keen observer with strong attention to detail, skilled at analyzing workflows and identifying gaps, issues, and opportunities for improvement.
- **Languages:** English (Conversational)
